

# Heat From Cities Is Changing Weather In Far-away Places

## Discussion

How are you doing today?

I feel a little tired because last night I returned home at 11:30.

Why so late?

I went to countryside for business.

What kind of business is done so late?

I asked some people to help me. I spent time talking a lot.

What are your plans for today?

I also have two classes.

I supposed to have meeting today but I asked for a leave.

If you were supposed to have a meeting today, why did you book this class.

Since you are not really attending the meeting, it seems that you really don't have to.

This meeting is so big, I lot of people will attend this meeting.

I will ask my colleagues about the meeting.

How much do we affect the weather?

Nowadays, people have cars, they drive cars every day. Cars emit a lot of pollution. It really affects our air condition. A lot of buldings use a lot of air conditioners.

Air conditioners make a lot of warm water.

How do air conditioners do it?

They make a lot of warm water.

Is it just because of the air conditioners?

I think it's the main reason.

Do you know that our planet went though periods when it was frozen completely?

These periods are called ice ages.

Is climate changing with or withour our influence?

Climate is changing with our influence.

Most of the heat comes from air conditioners and cars.
