

The Uninvited Visitor

Discussion

Have you tried experimenting with different patterns of sleep?
Some famous people like Nikola Tesla(famous physicist, responsible for alternating current).

There are two kinds of current: direct and alternating.

Nikola Tesla supposedly spelt only four hours a day.
He also lived to be 82 years old.

Are we sleeping too much?
I don't believe he only slept that little.

Maybe it's just a habbit. Like you a habbit of taking naps, and they work for you, I don't have this habbit so it doesn't work for me.

Maybe sleeping 4 hours a day is a habbit that we can develop?

Your energy levels depend on your sleep, diet, activities, general health, environment, etc.

Leonardo Da Vinci

There are few things that influece our sleep patterns: light, eating food, activity...

What do you think about the idea of going somewhere uninvited?

Have you ever received an uninvited visitor?

What does this convesation about?
He needs to entertain him. He wants to do something else.

What should he do when this uninvited guest arrives?
He needs to directly tell him, he needs to inform him about his visit in advance.

Vocabulary

Useful Words

1. bankrupt(adj.):lose all the money.
