

Creative Thinking Activities

Discussion

Do you just close your eyes, and relax for five minutes, or do you really fall asleep?

I meditate for minutes.

I meditate by taking thirty long breaths and then, I don't breath for a minute or two.

Are you a creative person?

No, I am not.

Why?

I really want to do things regularly.

Is it important for us to be creative?

Some students told me that Chinese educational system, doesn't encourage creative thinking. Even when you need to do an analysis of Chinese poem, you kinda need to remember your teachers opinion.

What is imagination?
