What is addiction?

It is the state of not being able to stop doing or using something.

What can people be addicted to?

People can be addicted to drugs, alcohol, gambling, coffee, video games...

I read that workaholics don't like like work but they don't like other parts of their lives, so they choose to work to escape other responsibilities.

Instead of making friends, and relationships, it's just easier to work. They can justify themselves by working hard and not doing anything else.

Maybe he is just very disciplined.

He really likes playing golf.
